with opal insert

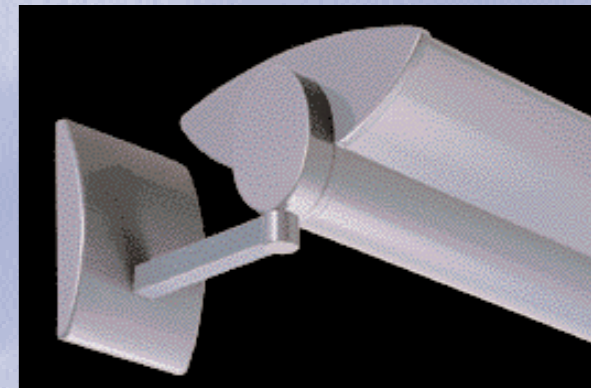

Sculptura Series: C5A Pendants; C5W Wall Brackets

The *Sculptura Series* of pendants and matching wall brackets is constructed of formed aluminum. This rugged compact design will accommodate a flexible range of lighting control options with up to (2) T5 or T5 HO lamps. A continuous row of fixtures can incorporate a versatile range of lighting controls within the same run to suit specific lighting tasks including solid body-100% indirect, perforated body-direct/indirect and totally direct. Four, eight or twelve foot standard mounting centers are available.

Sculptura C5A:W Series

C5A

C5W

Construction

Pendants - The fixture's formed aluminum body 82mm(3.2") high x 152mm(6.0") wide, in conjunction with the die cast end caps, offers strength for sections as long as a nominal 3660mm 12'-0". With only two hanger assemblies required, straight alignment for continuous row installations can be maintained with a minimal amount of supports. A mechanical inter-lock ensures straight runs for continuous run applications providing for a cost-effective installation. No disassembly of the product is required during installation.

Wall Brackets - The C5W are wall-mounted companions to the Sculptura series. Ideal for corridor, stairway and individual office lighting with solid body or perforated body panels. Also available with solid or perforated cross blade baffles (direct models only). Mounting plates are supplied with fixtures.

Mounting

Solid stem 10mm (3/8") OD, or aircraft cable complete with Quick-Grip field adjustment suspension system provides easy on-site alignments.

Finish

Standard: White, baked, powder coated polyester finish. Gloss 85%.
Custom colors available - consult factory.

Lighting Control Options

Perforated body.
Continuous diamond pattern with opal inlay.
Solid body: 100% upright
Solid cross blade baffle (direct).
Perforated cross blade baffle (direct).
Clear dust covers.
Opal insert: To mount between the lamps and the lower light controls.

Certification

All fixtures are CSA and UL listed.

Optics

Pendants - Computer modeled, formed painted steel materials are utilized to provide wide, horizontal indirect distribution and meets IES RP-1 Recommended Practice with select lamping and lighting controls.

Wall Brackets - Specular aluminum, computer modeled reflector assembly has been incorporated for asymmetric distribution.

Electrical

Integral, slim size, electronic ballast for T5 lamps at 120, 277 and 347 volts. Pre-wired for quick connection of individual sections and continuous runs to minimize installation time. No disassembly of the product is required.

Pendants: Can accommodate up to (2) T5; Wall Brackets: (1) T5, lamps provided by others

For multiple circuit, battery pack and emergency circuit wiring - consult factory.
