

ARCHES

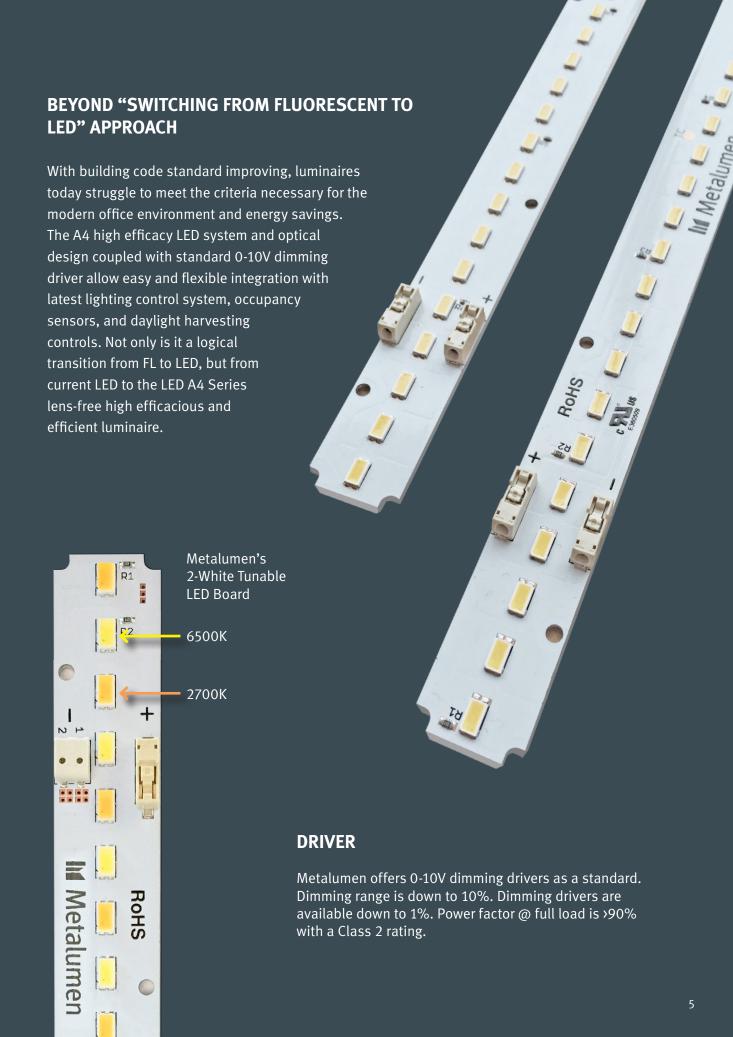

A4P & A4PI Pendant Series
A4S Surface Series

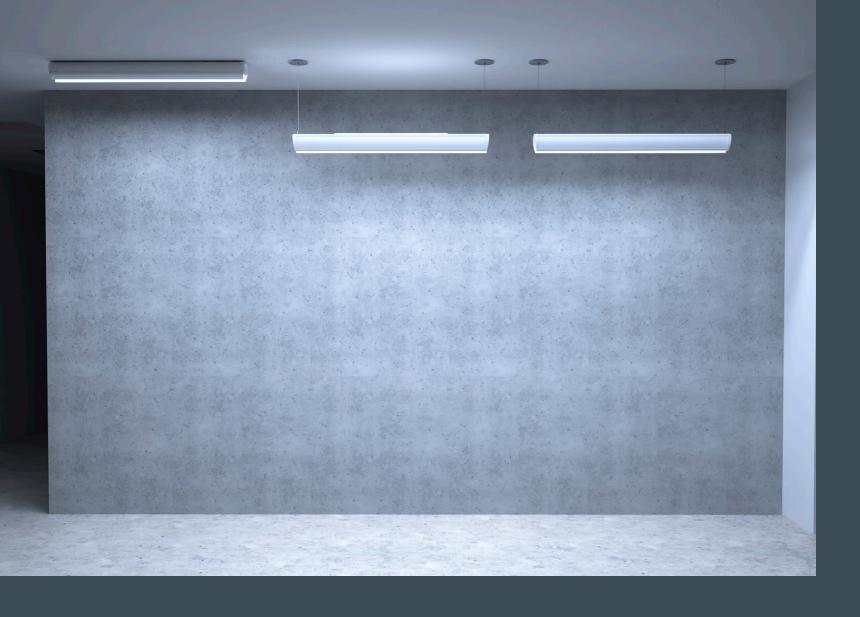

The ARCHES enjoys 100% concealed linear LED arrays mounted on both sides of the upper extrusion interior. With quick disconnect wiring, installation and maintenance has never been easier. The luminaires are offered in 3 fixed CCTs (3000K, 3500K, 4000K) and 2-White Tunable (2700K-6500K). The uplight component is controlled separately by a linear LED array facing upwards to maximize efficacy. Standard 0-10V drivers are included and 2-White Tunable separate controls are compatible with any standard DMX system in the market place.

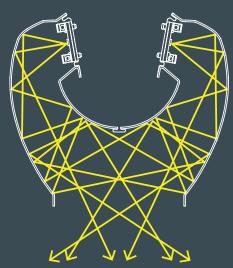

ARCHES' Floating-Optic® design marries a high (98%) reflectivity surface to carefully angled series of bends. The design is then complemented with a perfectly slanted LED array support to deliver a wide batwing distribution while hiding the source completely. The entire open cavity aperture is 2.3" wide creating a floating experience to a narrow profile that hides in the architecture of the space.

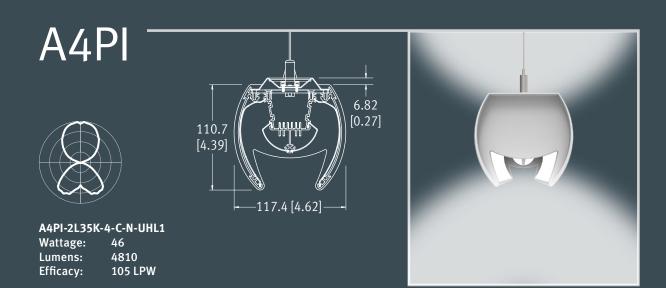

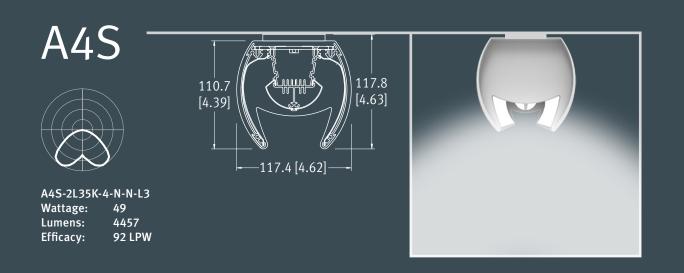

We have gone beyond the barrier of using lenses in our innovative fixtures. Our newly designed Floating Optic® luminaires are designed around the LED engine and high efficient optical system. We rely on every angle of the optical system utilized in our design to efficiently and optimally control the light beam. The carefully designed reflector also perfects the shape of the distribution curve to make sure it works best in the application for which it was designed.

92 LPW

CONTROL OPTIONS

2-White Tunable Module by Metalumen

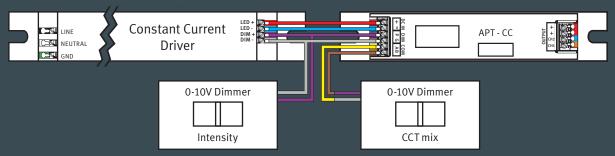

- DMX wired communication via COM ports with up to 512 addresses
- Dimming using a 0-10V dimmer connected to the COM ports

OPTION CODES	Max Output Channels	Max Output Power [W]	Max Channel Power [W]	Control over Driver Dim	0-10V Dim	Dim Minimum %	0-10V-CCT/Intensity
V	2	100	100	•	*		•
X	2	100	100	•	1%	•	

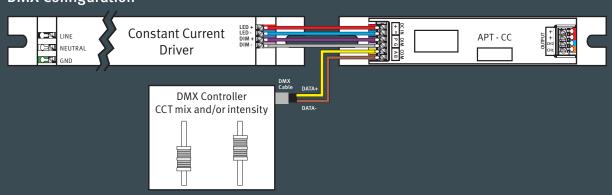

^{* =} Dim minimum limited by driver specs

WIRING DIAGRAM

Dual 0-10V Dimmer Configuration

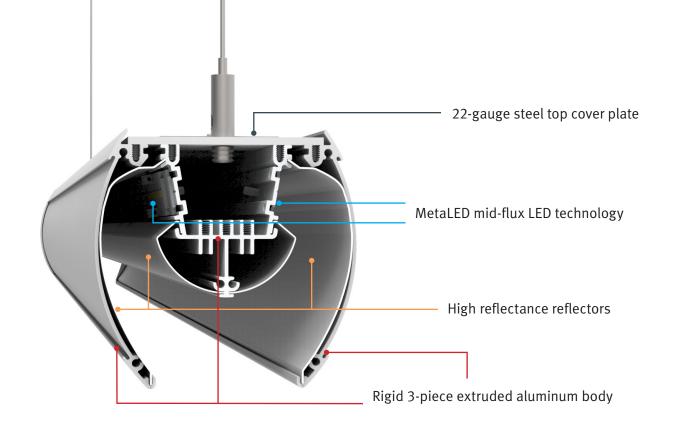

DMX Configuration

2-White Tunable Control Options (By Others):

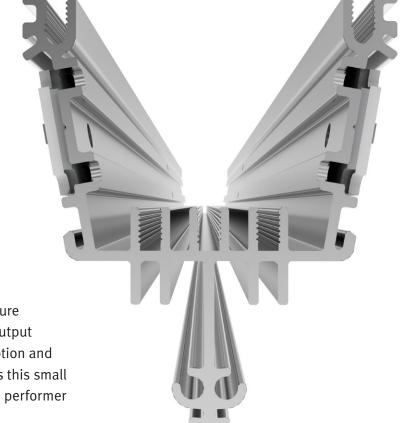

- Standard 512 channel DMX system by Lutron, Fulham, etc... (requires complete DMX system)
- Standard 0-10V dimmers: one for Intensity and another for CCT mix.

EXTRUSION

Extrusion and LED-Engine coupling design is engineered for maximum heat dissipation.

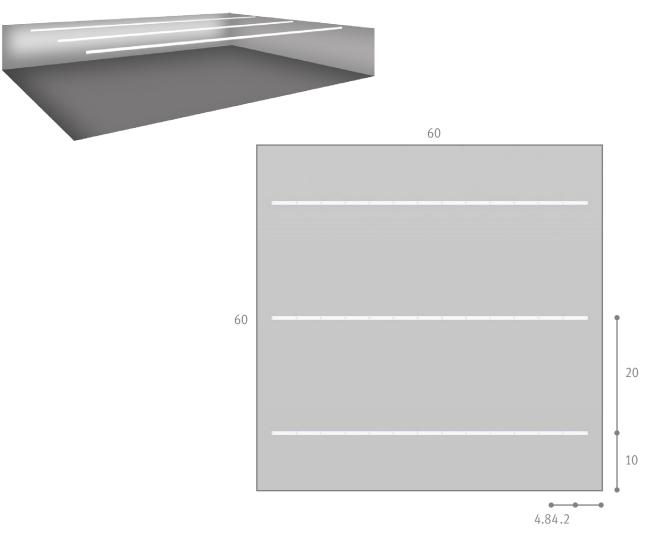

The finned surface at different angles optimally keep the LED array at low operating temperature maintaining consistent lumen output performance, wattage consumption and long life. Our fixture design puts this small form luminaire with a beast of a performer attitude at L90>60,000h.

^{***} Calculation is based on actual LED fixture used in comparison to a 2-T5 28W FL fixture. Assumptions are \$0.12 per KWh and 10 operating Hours/day (10h @ full power). These are estimated savings only. Annual and monthly savings are based on a number of variables and assumptions that could change over time. The actual savings derived by our firm may be higher or lower. Metalumen's business does not imply a warranty of performance or savings as calculated and shown within this document.

LED VS. FLUORESCENT ENERGY SAVINGS

Due to Metalumen's continuous improvement policy, specifications may change without notice.

STANDARD LENGTHS

See spec sheet for decal dimensions

STANDARD FINISHES

Custom finishes available. Specify RAL# in spec sheet.

APPROVALS

Conforming to NRTL safety and IES recommendation testing standards. All components are UL/CSA/QPS recognized or listed. RoHS, LM79, LM80 and LM82 compliant.

ENVIRONMENT

Suitable for dry locations.

WARRANTY

Metalumen will warrant defective luminaires for 5 years from date of purchase. Warranty is valid if luminaire is installed and used according to specification. If defective, Metalumen will send replacement boards or drivers at no cost along with detailed replacement instructions and instructions on how to return defective components to Metalumen.
