JOINING INSTRUCTIONS

STEP 1. Remove fixture packaging; note marked supply wires coming out at the back of the luminaire.

STEP 2. Install Griplocks into all six corners. Use Loctite to insure proper fastening. The Griplock must point towards the central axis of the fixture.

STEP 3. Remove lenses reflectors at the two joining sections. Join the two sections by sliding the two brackets into the adjoining section.

STEP 4. Fasten the nuts at the joining brackets to ensure a tight fit. Re-install the reflectors and the lenses.

HANGER BRACKET must point in the direction of the run. This will allow for the hanger location to be modified in order to keep it plumb.

STEP 5. Install hanger brackets for the fixture. Adjust height of the fixture using the top three aircraft cables.
